

Px11Utils

Px11Utils is a Windows based program which provides utilities for positioning data recorded in the new OGP Px/11 formats as well as the old UKOOA formats.

Features

- Format and integrity checking
 - Checks for format non-compliance
 - Checks for integrity errors such as missing references, coordinate conversions
- File contents inspector
 - Displays file contents allowing editing
 - Display the relevant record format as the user selects the record
 - Populates the fields in the format display with the data from the file
 - Maintains browsing history allowing easy navigation through the file
 - Provides hyperlinks for referenced entities
 - Smart filtering for CRS records
- File converter
 - Converts P2/94/91 to P2/11
 - Converts P1/90 to P1/11
 - Converts P6/98 to P6/11
- Create summary report from Px/11 header
- Search Px/11 files based on specified criteria e.g. number of vessels, sources, streamers etc.
- Generate new entity reference IDs
- Batch file processing

Licences

Two licensing options are available:

- Lite – no cost, batch processing is not available, processes are limited to 10 shots of data records, some utilities are not available.
- Pro – fully functional, enquire for licence options.
